

Winter Laneway Maintenance

Winter Laneway Maintenance Benefits Everyone

As the days start getting colder and the snow begins to fly, laneway and yard maintenance will be something to keep in mind. As a friendly reminder to all our customers, snow and ice removal is important for your yard and also for everyone's safety.

Tips for Proper Snow Maintenance

- Remove snow from the width of the laneway (not just one pass)
- Remove yard snow all the way up to the bin
- Apply ice salt or sand regularly, to areas that are ice covered (either on the laneway or areas in the yard)
- Use markers to define the lane to help keep trucks off the lawn

Maintaining your farm laneway and yard, doesn't just keep our drivers safe, it also keeps our deliveries timely so we can meet every customer's deadline. We thank you for your understanding and look forward to filling your orders safely this winter!
